# TECHNICAL RECORD EKYNET-DA1

## **DESCRIPTION :**

Liquid product specially developed for chemical and ultrasonic degreasing of stainless steel, steel, aluminum, brass, copper and certain alloys parts.

Free of methylene chloride and phenols.

Developed for the removal of all types of paints (epoxy, polyester, electro coating etc.) on all types of materials.

Low evaporation compared with strippers based on methylene chloride, which reduces the emission of solvents to the workplace, increasing the safety of handling and use.

Its perfect combination of solvents and alkalinity allows rapidly dissolving of films of all types paints: polyester, epoxy, epoxy-polyester, cataphoresis etc.

## **PHYSICAL AND CHEMICAL PROPERTIES:**

Slightly opalescent, colorless liquid with a characteristic odor.

Density at 20 ° C = 1.04 ± 0.02 g / ml

## **METHODS AND INSTRUCTIONS FOR USE:**

Concentration: 100% EKYNET DA1 (**Do not add water**).

Working temperature: 40 - 60°C. For tires it is recommended to increase the working temperature up to 80°C.

## **MODE OF SUPPLY:**

Bottle of 25 kilos.

Container of 1000 kilos.
